

Najmos Sakib

My goal is to make myself a valuable addition to any team. I strive to make my work environment as cohesive and productive as possible. I do this by being a dynamic learner, listener, and consistently improving my hard and soft skills. All-in-all, curating a growth mindset along with my natural friendliness and sense of humor makes me great in groups.

EXPERIENCE

Customer Service/Co-Social Media Content Creator - RushBowls (Acai Bowls/Smoothies)

Sandy Springs, GA (2019-Present)

I hold a number of roles and responsibilities at Rush Bowls, including event coordination in order to increase brand awareness, and collaboration with local businesses in order to reach target customers interested in trends such as natural foods, whole foods, overall well being, and fitness, just to name a few.

Kroger - Produce Clerk

Gainesville, GA (2018)

My main responsibilities included cleaning, prepping, stocking, and removing rotten/expired produce.

Happy Food Mart - Tech. Manager

Gainesville GA (Began in 2013-Present)

Over the years I've taken up more responsibilities, the most significant of which has been reducing business operation costs. This has been done by finding and maintaining relationships with merchants that provide in-demand wholesale goods for cheaper. Reducing costs have allowed us to experiment with items not found in typical corner stores/gas stations, ensuring that customers return and tell others about us. I set up the POS system; migrated security solutions, insurance providers, contractors, and wholesale merchants to those that strategically fit the needs of a small business better.

FIRST Robotics (Founding member) - Team 5074

I was a founding member of the FIRST robotics Team #5074, which has won several local/state competitions.

EDUCATION

Georgia Institute of Technology PE

Professional Education Certification - Full Stack Software Development
(May 2020)
University of North Georgia (2017 -2018)

SKILLS

JavaScript
Java
HTML + CSS, & Frameworks
